Subject: ECP GR-26 Recorder Adapter Plate

Dear Nat,

This letter confirms my telecon of 19 January 1966,
with you and [redacted]

This ECP is cancelled. However, we have learned that damage to the aircraft's recorder cooling air outlet frequently occurs with the present adapter plate. We recommend that you fabricate and deliver a total of 6 each of the new adapter plates.

The preferable method of accomplishing the end result of inserting a new item of AGE to replace Part Number 531A970-034-101 follows:

a. The new Recorder Adapter, Part Number 531A970-042-101, is initial AGE and as such is an integral part of initial provisions under the production contract.

b. The Contractor shall submit a new AGE Requirements List (Fig 1) to the PSO and the SPO with appropriate information thereon including distribution of the new AGE items to locations at BW-4, BW-5, and BW-6. In the remarks section of the Figure 1, indicate the reason for the change, the required disposition of the superseded AGE items, delivery schedule, estimated cost, etc.

c. The Contractor shall accomplish the necessary changes to the handbooks and manuals as these are affected by this new AGE equipment.

Best regards,

STATINTL

SUBJECT: Recorder Adapter Plate
(AGERL Item 11, Revised 1 Sept. 1965)

ENCLS: A - ECP GR-26
B - Nat/Rus Agreement G-146
C - AGERL Item 11, Revised 1 Sept. 1965

Enclosure B indicates coordination between GR and ADP on the Recorder Adapter Plate. The revised drawing incorporating ADP's marked print will be returned to ADP for approval on 3 September 1965.

It is requested that Enclosure A be approved and quantities indicated on Enclosure C be approved. I have checked BW-4 (our personnel) and they desire a new plate also. In addition to the costs included in ECP-26, \$1,400 will be required on the Prototype Program. LP-2263
